Description

Actually, there is a debug message in the log with the content of ParametrosSeleneLista into the operation LeerEntejes.
The operation LeerEntejes is executed every time the base dialog is showed. Therefore, it is necessary to delete this message.
To prevent the compiler warning about the unused logger, include a new debug message in the log with the selected enteje.
Enlarge the interval of enteje to 10 years before the selected enteje because, actually, there aren't any information in exercises until ten years ago
