History

#1 - 09/12/2018 05:57 PM - Jesús Freire

- Parent task set to #214

#2 - 09/18/2018 07:29 AM - Jesús Freire

- Status changed from Nueva to En curso

#3 - 09/28/2018 11:56 AM - Jesús Freire

- Status changed from En curso to Rechazada

EJB are interfaces that extends interfaces from the logic layer.

So, it isn't possible to make a class that encapsulates an EJB because it should implement all the methods defined in the logic layer
